Wheatland Elementary School District

» An annual report to the community about teaching, learning, test results, resources, and measures of progress in our school.

# Bear River Middle School

School Accountability Report Card, 2008–2009  
Wheatland Elementary School District

This School Accountability Report Card (SARC) provides information that can be used to evaluate and compare schools. State and federal laws require all schools to publish a SARC each year.

The information in this report represents the 2008–2009 school year, not the current school year. In most cases, this is the most recent data available. We present our school's results next to those of the average middle school in the county and state to provide the most meaningful and fair comparisons. To find additional facts about our school online, please use the [DataQuest](#) tool offered by the California Department of Education.

If you are reading a printed version of this report, note that words that appear in a smaller, bold typeface are links in the online version of this report to even more information. You can find a master list of those linked words, and the Web page addresses they are connected to, at:

[http://www.schoolwisepress.com/sarc/links\\_2009\\_en.html](http://www.schoolwisepress.com/sarc/links_2009_en.html)

Reports about other schools are available on the [California Department of Education Web site](#). Internet access is available in local libraries.

If you have any questions related to this report, please contact the school office.

# Bear River Middle School

School Accountability Report Card, 2008–2009  
Wheatland Elementary School District

## » Principal's Message

Students who attend Bear River Middle School receive an exemplary education and an opportunity to expand academically. In addition to providing excellent core classes (language arts, math, science, and history), we offer a choice of electives. Our electives include Spanish, German, band, computers, art, video editing, PE games, horticulture, yearbook, leadership, and Renaissance. We have many afterschool activities, including an excellent sports program. Students have the opportunity to expand personal skills through our Leadership classes. Leadership students are given opportunities to be mentors, school officers, program activity directors, peer mediators, and much more.

Our student achievement scores have improved by approximately 10 points for the last five years. The school is five years old, and we are very fortunate to have a beautiful facility. Our recreational and athletic facilities are top notch, and we are currently working to expand our playground area. We have a full-size gymnasium, which includes a weight room. The gym is wired with a large video screen and a complete audio-visual system. On the blacktop the students have access to eight full-court basketball courts, two wall ball courts, three tetherball courts, four square areas, and a grass football/soccer field.

One of our strongest assets is our student motivation and rewards program called Renaissance. We recognize our students for their efforts as well as their achievement by giving rewards at break, at lunch, and at our trimester Renaissance Rallies.

Another wonderful component of our school is the Family Resource Center (FRC), which provides assistance and resources for families. The FRC is also a haven at lunch time, break, and after school for students. The FRC facilitates case management for students, including connecting families to county resources and acting as a liaison between parents and school. As part of the Family Resource Team, the School Resource Officer (SRO) is contracted through Yuba County Probation and paid using a grant. The SRO monitors grades, behavior, and attendance for at-risk students. He also provides supervision of recreational activities. The SRO is the facilitator of Peer Leaders Uniting Students (PLUS) and social remediation groups. The mission of PLUS is to serve as a means for students to develop an understanding of who they are, rather than what they are. It is a platform for students to express their individuality, while identifying similarities with those around them. The overall purpose of PLUS is to stimulate conversations between students who have never spoken together before. Students who engage in PLUS activities will develop a sense of belonging. PLUS empowers students to lead, educate, influence, and support their peers. It also provides an ongoing plan that enables our school to address all issues that affect students' learning

environment. Our wonderful students, families, and dedicated teaching team and support staff make Bear River Middle School a fabulous place to work and learn.

Debbie Schoeppach, PRINCIPAL

## **School Expenditures**

We use School Improvement funds to purchase supplies for elective courses, including horticulture, music, band, and foreign languages. Title I money is used for staff training, particularly for Essential Skills of Instruction and Step Up to Writing. School Improvement funds and state funds, which are designated for specific purposes, are used to purchase technology. We continually update our library with books and quizzes that support our Accelerated Reader program. We are fortunate to be the recipients of grant funds for school community policing and Title II delinquency prevention monies from juvenile justice.

## **Safety**

Bear River Middle School provides a safe and clean environment for students, staff, and volunteers. We provide supervision for our students before, during, and after school. There are designated areas for student drop off and pick up. Bear River Middle School is a closed campus. For security purposes, all visitors are required to sign in at the office while on school grounds and all volunteers are required to have Department of Justice clearance through fingerprinting.

The school safety committee meets monthly to discuss safety on campus. The committee works with the vice-principal to develop scenarios so that staff can practice emergency procedures during faculty meetings. The district contracted with D-Prep to evaluate our emergency preparedness plan and identify strategies for improvement. D-Prep also provided staff training in the implementation of the safety plan. The School Safety Plan is updated yearly.

Bear River holds monthly Fire Drills and a yearly Lock-Down Drill. The school works collaboratively with Wheatland Fire and Police Departments to coordinate emergency preparedness.

## **Buildings**

Bear River Middle School is five years old. It is a beautiful and immaculate campus. The campus has a wide-open feel but is equipped with appropriate lighting and security cameras in strategic areas to promote safety. Bear River has Site established cleaning standards and four full-time custodians. The campus is always well maintained and classrooms and bathrooms are cleaned daily. Only minor repairs to the carpet and weather stripping in some of our classrooms are necessary due to usual wear and tear. There is adequate room for all students in classrooms, on the playground, and in the eating areas. We have a fully functioning kitchen and multipurpose room with plenty of tables and room to sit. We also have an outstanding full-size gymnasium that is used for school sports programs and for community events. There is room behind our campus for future expansion of our school or for sports fields and other extracurricular activities.

## **Parent Involvement**

Our school's annual site plan and school site budget approvals are made by our School Site Council. The Site Council is comprised of parent members, certificated staff, classified staff, student body representatives, and site administration. We have a District English Language Advisory Committee to help students and their families who are learning English feel welcome at our school. At Back-to-School Night parents can sign up to volunteer in their areas of interest at our school; the sign-up form is also available online. We give teachers the lists of parents who are interested in volunteering in their classroom or for particular events. We recognize volunteers at trimester rallies for their service and donations.

Please contact Cory O'Neal, our Family Resource Center director, if you would like to volunteer, at (530) 633-4061.

**MEASURES OF PROGRESS**

**Academic Performance Index**

The Academic Performance Index (API) is California’s way of comparing schools based on student test scores. The index was created in 1999 to help parents and educators recognize schools that show progress and identify schools that need help. A school’s API determines whether it receives recognition or sanctions. It is also used to compare schools in a statewide ranking system. The California Department of Education (CDE) calculates a school’s API using student test results from the California Standards Tests and, for high schools, the California High School Exit Exam (CAHSEE). APIs range from 200 to 1000. The CDE expects all schools to eventually obtain APIs of at least 800. [Additional information on the API](#) can be found on the CDE Web site.

| CALIFORNIA<br><b>API</b><br>ACADEMIC PERFORMANCE INDEX |            |
|--|------------|
| <b>Met schoolwide growth target</b>                    | <b>Yes</b> |
| <b>Met growth target for prior school year</b>         | <b>Yes</b> |
| <b>API score</b>                                       | <b>782</b> |
| <b>Growth attained from prior year</b>                 | <b>+12</b> |
| <b>Met subgroup* growth targets</b>                    | <b>No</b>  |

Bear River’s API was 782 (out of 1000). This is an increase of 12 points compared with last year’s API. All students took the test. You can find three years of detailed API results in the Data Almanac that accompanies this report.

**API RANKINGS:** Based on our 2007–2008 test results, we started the 2008–2009 school year with a base API of 770. The state ranks all schools according to this score on a scale from 1 to 10 (10 being highest). Compared with all middle schools in California, our school ranked 6 out of 10.

SOURCE: API based on spring 2009 test cycle. Growth scores alone are displayed and are current as of December 2009.

\*Ethnic groups, English Learners, special ed students, or socioeconomic groups of students that make up 15 percent or more of a school’s student body. These groups must meet AYP and API goals.  
R/P - Results pending due to challenge by school.  
N/A - Results not available.

**SIMILAR SCHOOL RANKINGS:** We also received a second ranking that compared us with the 100 schools with the most similar students, teachers, and class sizes. Compared with these schools, our school ranked 3 out of 10. The CDE recalculates this factor every year. To read more about the specific elements included in this calculation, refer to the [CDE Web site](#).

**API GROWTH TARGETS:** Each year the CDE sets specific API “growth targets” for every school. It assigns one growth target for the entire school, and it sets additional targets for ethnic groups, English Learners, special education students, or socioeconomic subgroups of students that make up a significant portion of the student body. Schools are required to meet all of their growth targets. If they do, they may be eligible to apply for awards through the California School Recognition Program and the Title I Achieving Schools Program.

We did not meet some or all of our assigned growth targets during the 2008–2009 school year. Just for reference, 50 percent of middle schools statewide met their growth targets.

**API, Spring 2009**

SOURCE: API based on spring 2009 test cycle. State average represents middle schools only.  
NOTE: Only groups of students that represent at least 15 percent of total enrollment are calculated and displayed as student subgroups.

### Adequate Yearly Progress

In addition to California’s accountability system, which measures student achievement using the API, schools must also meet requirements set by the federal education law known as **No Child Left Behind** (NCLB). This law requires all schools to meet a different goal: **Adequate Yearly Progress** (AYP).

We met 11 out of 13 criteria for yearly progress. Because we fell short in two areas, we did not make AYP.

To meet AYP, middle schools must meet three criteria. First, a certain percentage of students must score at or above Proficient levels on the California Standards Tests (CST): 46 percent on the English/language arts test and 47.5 percent on the math test. All ethnic and socioeconomic subgroups of students also must meet these goals. Second, the schools must achieve an API of at least 650 or increase the API by one point from the prior year. Third, 95 percent of the student body must take the required standardized tests.

If even one subgroup of students fails to meet just one of the criteria, the school fails to meet AYP. While all schools must report their progress toward meeting AYP, only schools that receive federal funding to help economically disadvantaged students are actually penalized if they fail to meet AYP goals. Schools that do not make AYP for two or more years in a row in the same subject enter **Program Improvement** (PI). They must offer students transfers to other schools in the district and, in their second year in PI, tutoring services as well.

| FEDERAL<br><b>AYP</b><br>ADEQUATE YEARLY PROGRESS |            |
|---|------------|
| <b>Met AYP</b>                                    | <b>No</b>  |
| <b>Met schoolwide participation rate</b>          | <b>Yes</b> |
| <b>Met schoolwide test score goals</b>            | <b>No</b>  |
| <b>Met subgroup* participation rate</b>           | <b>Yes</b> |
| <b>Met subgroup* test score goals</b>             | <b>No</b>  |
| <b>Met schoolwide API for AYP</b>                 | <b>Yes</b> |
| <b>Program Improvement school in 2009</b>         | <b>No</b>  |

SOURCE: AYP is based on the Accountability Progress Report of December 2009. A school can be in Program Improvement based on students’ test results in the 2008–2009 school year or earlier.

\*Ethnic groups, English Learners, special ed students, or socioeconomic groups of students that make up 15 percent or more of a school’s student body. These groups must meet AYP and API goals. R/P - Results pending due to challenge by school. N/A - Results not available.

### Adequate Yearly Progress, Detail by Subgroup

| White/Other                  | ●                                 | ●  | ●                                 | ●  |

SOURCE: AYP release of September 2009, CDE.

The table at left shows our success or failure in meeting AYP goals in the 2008–2009 school year. The green dots represent goals we met; red dots indicate goals we missed. Just one red dot means that we failed to meet AYP.

Note: Dashes indicate that too few students were in the category to draw meaningful conclusions. Federal law requires valid test scores from at least 50 students for statistical significance.

## STUDENT ACHIEVEMENT

Here you'll find a three-year summary of our students' scores on the California Standards Tests (CST) in selected subjects. We compare our students' test scores with the results for students in the average middle school in California. On the following pages we provide more detail for each test, including the scores for different subgroups of students. In addition, we provide links to the California Content Standards on which these tests are based. If you'd like more information about the CST, please contact our principal or our teaching staff. To find [grade-level-specific scores](#), you can refer to the Standardized Testing and Reporting (STAR) Web site. Other tests in the [STAR program](#) can be found on the California Department of Education (CDE) Web site.

### California Standards Tests

BAR GRAPHS BELOW SHOW THESE PROFICIENCY GROUPS (LEFT TO RIGHT):

■ FAR BELOW BASIC ■ BELOW BASIC ■ BASIC ■ PROFICIENT ■ ADVANCED

SOURCE: The scores for the CST are from the spring 2009 test cycle. State average represents middle schools only. Whenever a school reports fewer than 11 scores for a particular subgroup at any grade level, the CDE suppresses the scores when it releases the data to the public. Missing data makes it impossible for us to compile complete schoolwide results. Therefore, the results published in this report may vary from other published CDE test scores.

## Frequently Asked Questions About Standardized Tests

**WHERE CAN I FIND GRADE-LEVEL REPORTS?** Due to space constraints and concern for statistical reliability, we have omitted grade-level detail from these test results. Instead we present results at the schoolwide level. You can view the results of far more students than any one grade level would contain, which also improves their statistical reliability. Grade-level results are online on the [STAR Web site](#). More information about student test scores is available in the Data Almanac that accompanies this report.

**WHAT DO THE FIVE PROFICIENCY BANDS MEAN?** Test experts assign students to one of these five proficiency levels, based on the number of questions they answer correctly. Our immediate goal is to help students move up one level. Our eventual goal is to enable all students to reach either of the top two bands, Advanced or Proficient. Those who score in the middle band, Basic, have come close to attaining the required knowledge and skills. Those who score in either of the bottom two bands, Below Basic or Far Below Basic, need more help to reach the Proficient level.

**HOW HARD ARE THE CALIFORNIA STANDARDS TESTS?** Experts consider California's standards to be among the most clear and rigorous in the country. Just 53 percent of elementary school students scored Proficient or Advanced on the English/language arts test; 59 percent scored Proficient or Advanced in math. You can review the [California Content Standards](#) on the CDE Web site.

**ARE ALL STUDENTS' SCORES INCLUDED?** No. Only students in grades two through eleven are required to take the CST. When fewer than 11 students in one grade or subgroup take a test, state officials remove their scores from the report. They omit them to protect students' privacy, as called for by federal law.

**CAN I REVIEW SAMPLE TEST QUESTIONS?** Sample test questions for the CST are on the [CDE's Web site](#). These are actual questions used in previous years.

**WHERE CAN I FIND ADDITIONAL INFORMATION?** The CDE has a wealth of resources on its Web site. The STAR Web site publishes detailed reports for schools and districts, and assistance packets for parents and teachers. This site includes explanations of [technical terms](#), scoring methods, and the [subjects](#) covered by the tests for each grade. You'll also find a [guide](#) to navigating the STAR Web site as well as help for understanding how to [compare test scores](#).

### English/Language Arts (Reading and Writing)

BAR GRAPHS BELOW SHOW THESE PROFICIENCY GROUPS (LEFT TO RIGHT):

**FAR BELOW BASIC** **BELOW BASIC** **BASIC** **PROFICIENT** **ADVANCED**

| GROUP                                      | LOW SCORES | HIGH SCORES | PROFICIENT OR ADVANCED | STUDENTS TESTED | COMMENTS  |
|--|------------|-------------|------------------------|-----------------|---|
| <b>SCHOOLWIDE AVERAGE</b>                  |            |             | 53%                    | 99%             | <b>SCHOOLWIDE AVERAGE:</b> About three percent more students at our school scored Proficient or Advanced than at the average middle school in California. |

| <b>AVERAGE MIDDLE SCHOOL IN CALIFORNIA</b> |            |             | 50%                    | 96%             |   |

### Subgroup Test Scores

BAR GRAPHS BELOW SHOW TWO PROFICIENCY GROUPS (LEFT TO RIGHT):

**FAR BELOW BASIC, BELOW BASIC, AND BASIC** **PROFICIENT AND ADVANCED**

| GROUP                        | LOW SCORES        | HIGH SCORES | PROFICIENT OR ADVANCED | STUDENTS TESTED | COMMENTS  |
|------------------------------|-------------------|-------------|------------------------|-----------------|---|
| <b>Boys</b>                  |                   |             | 50%                    | 197             | <b>GENDER:</b> About seven percent more girls than boys at our school scored Proficient or Advanced.  |
| <b>Girls</b>                 |                   |             | 57%                    | 197             |   |
| <b>English proficient</b>    |                   |             | 55%                    | 379             | <b>ENGLISH PROFICIENCY:</b> We cannot compare scores for these two subgroups because the number of English Learners tested was either zero or too small to be statistically significant.                                    |
| <b>English Learners</b>      | NO DATA AVAILABLE |             | N/A                    | 12              |   |
| <b>Low income</b>            | NO DATA AVAILABLE |             | N/A                    | 25              | <b>INCOME:</b> We cannot compare scores for these two subgroups because the number of students tested from low-income families was either zero or too small to be statistically significant.                                |
| <b>Not low income</b>        |                   |             | 55%                    | 366             |   |
| <b>Learning disabled</b>     | NO DATA AVAILABLE |             | N/A                    | 1               | <b>LEARNING DISABILITIES:</b> We cannot compare scores for these two subgroups because the number of students tested with learning disabilities was either zero or too small to be statistically significant.               |
| <b>Not learning disabled</b> |                   |             | 54%                    | 393             |   |
| <b>Hispanic/Latino</b>       |                   |             | 49%                    | 77              | <b>ETHNICITY:</b> Test scores are likely to vary among students of different ethnic origins. The degree of variance will differ from school to school. Measures of the achievement gap are beyond the scope of this report. |
| <b>White/Other</b>           |                   |             | 57%                    | 252             |   |

SOURCE: The scores for the CST are from the spring 2009 test cycle. County and state averages represent middle schools only. Whenever a school reports fewer than 11 scores for a particular subgroup at any grade level, the CDE suppresses the scores when it releases the data to the public. Missing data makes it impossible for us to compile complete schoolwide results. Therefore, the results published in this report may vary from other published CDE test scores.  
 N/A: Not applicable. Either no students took the test, or to safeguard student privacy the CDE withheld all results because very few students took the test in any grade.  
 NS: Not statistically significant. While we have some data to report, we are suppressing it because the number of valid test scores is not large enough to be meaningful.

The graph to the right shows how our students' scores have changed over the years. We present each year's results in a vertical bar, with students' scores arrayed across five proficiency bands. When viewing schoolwide results over time, remember that **progress** can take many forms. It can be more students scoring in the top proficiency bands (blue); it can also be fewer students scoring in the lower two proficiency bands (brown and red).

You can read the California standards for [English/language arts](#) on the CDE's Web site.

### Math (Excluding Algebra)

The degree of variance will differ from school to school. Measures of the achievement gap are beyond the scope of this report. |
| <b>White/Other</b>           |                   |             | 47%                    | 191             |   |

SOURCE: The scores for the CST are from the spring 2009 test cycle. County and state averages represent middle schools only. Whenever a school reports fewer than 11 scores for a particular subgroup at any grade level, the CDE suppresses the scores when it releases the data to the public. Missing data makes it impossible for us to compile complete schoolwide results. Therefore, the results published in this report may vary from other published CDE test scores.  
 N/A: Not applicable. Either no students took the test, or to safeguard student privacy the CDE withheld all results because very few students took the test in any grade.  
 NS: Not statistically significant. While we have some data to report, we are suppressing it because the number of valid test scores is not large enough to be meaningful.

All sixth and most seventh graders take the same math courses. Starting as early as seventh grade, however, some students take algebra, while others take a general math course. We report algebra results separately. Here we present our students' scores for all math courses except algebra.

The graph to the right shows how our students' scores have changed over the years. We present each year's results in a vertical bar, with students' scores arrayed across five proficiency bands. When viewing schoolwide results over time, remember that **progress** can take many forms. It can be more students scoring in the top proficiency bands (blue); it can also be fewer students scoring in the lower two proficiency bands (brown and red).

You can read the [math standards](#) on the CDE's Web site.

 N/S: Not statistically significant. While we have some data to report, we are suppressing it because the number of valid test scores is not large enough to be meaningful.

We report our students’ algebra results separately because of the central importance of algebra in the California math standards. It is also a gateway course for college-bound students, who should start high school ready for geometry.

The graph to the right shows how our students’ scores have changed over the years. We present each year’s results in a vertical bar, with students’ scores arrayed across five proficiency bands. When viewing schoolwide results over time, remember that **progress** can take many forms. It can be more students scoring in the top proficiency bands (blue); it can also be fewer students scoring in the lower two proficiency bands (brown and red).

About 34 percent of our seventh and eighth grade students took the algebra CST, compared with 30 percent of all middle school students statewide. You can review the **math** standards on the CDE’s Web site.

The graph to the right shows how our eighth grade students’ scores have changed over the years. We present each year’s results in a vertical bar, with students’ scores arrayed across five proficiency bands. When viewing schoolwide results over time, remember that **progress** can take many forms. It can be more students scoring in the top proficiency bands (blue); it can also be fewer students scoring in the lower two proficiency bands (brown and red).

Although we teach science at all grade levels, only our eighth graders took the California Standards Test in this subject. You can read the **science standards** on the CDE’s Web site.

**Three-Year Trend: Science**

**STUDENTS**

**Students’ English Language Skills**

At Bear River, 98 percent of students were considered to be proficient in English, compared with 81 percent of middle school students in California overall.

| LANGUAGE SKILLS             | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|-----------------------------|------------|----------------|---------------|
| English-proficient students | 98%        | 90%            | 81%           |
| English Learners            | 2%         | 10%            | 19%           |

SOURCE: Language Census for school year 2008–2009. County and state averages represent middle schools only.

**Languages Spoken at Home by English Learners**

Please note that this table describes the home languages of just the nine students classified as English Learners. At Bear River, the language these students most often speak at home is Spanish. In California it’s common to find English Learners in classes with students who speak English well. When you visit our classrooms, ask our teachers how they work with language differences among their students.

| LANGUAGE         | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|------------------|------------|----------------|---------------|
| Spanish          | 67%        | 72%            | 86%           |
| Vietnamese       | 0%         | 0%             | 2%            |
| Cantonese        | 0%         | 0%             | 1%            |
| Hmong            | 0%         | 20%            | 1%            |
| Filipino/Tagalog | 0%         | 0%             | 1%            |
| Korean           | 0%         | 0%             | 1%            |
| Khmer/Cambodian  | 33%        | 1%             | 1%            |
| All other        | 0%         | 7%             | 7%            |

SOURCE: Language Census for school year 2008–2009. County and state averages represent middle schools only.

**Ethnicity**

Almost all students at Bear River identify themselves as White/European American/Other. The state of California allows citizens to choose more than one ethnic identity, or to select “multiethnic” or “decline to state.” As a consequence, the sum of all responses rarely equals 100 percent.

| ETHNICITY                           | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|-------------------------------------|------------|----------------|---------------|
| African American                    | 0%         | 3%             | 8%            |
| Asian American/<br>Pacific Islander | 0%         | 6%             | 11%           |
| Hispanic/Latino                     | 0%         | 21%            | 48%           |
| White/European American/<br>Other   | 99%        | 70%            | 34%           |

SOURCE: CBEDS census of October 2008. County and state averages represent middle schools only.

**Family Income and Education**

The **free or reduced-price meal** subsidy goes to students whose families earned less than \$39,220 a year (based on a family of four) in the 2008–2009 school year. At Bear River, 46 percent of the students qualified for this program, compared with 55 percent of students in California.

| FAMILY FACTORS              | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|-----------------------------|------------|----------------|---------------|
| Low-income indicator        | 46%        | 52%            | 55%           |
| Parents with some college   | 59%        | 59%            | 55%           |
| Parents with college degree | 30%        | 24%            | 31%           |

SOURCE: The free and reduced-price lunch information is gathered by most districts in October. This data is from the 2008–2009 school year. Parents’ education level is collected in the spring at the start of testing. Rarely do all students answer these questions. County and state averages represent middle schools only.

The parents of 59 percent of the students at Bear River have attended college and 30 percent have a college degree. This information can provide some clues to the level of literacy children bring to school. One precaution is that the students themselves provide this data when they take the battery of standardized tests each spring, so it may not be completely accurate. About 90 percent of our students provided this information.

**CLIMATE FOR LEARNING**

**Average Class Sizes**

The table at the right shows average class sizes for core courses. The average class size of all courses at Bear River varies from a low of 24 students to a high of 26. Our average class size schoolwide is 24 students. The average class size for middle schools in the state is 27 students.

| AVERAGE CLASS SIZES OF CORE COURSES | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|-------------------------------------|------------|----------------|---------------|
| English                             | 24         | 22             | 25            |
| History                             | 26         | 22             | 28            |
| Math                                | 24         | 19             | 27            |
| Science                             | 25         | 17             | 28            |

SOURCE: CBEDS census, October 2008. County and state averages represent middle schools only.

**Discipline**

At times we find it necessary to suspend students who break school rules. We report only suspensions in which students are sent home for a day or longer. We do not report in-school suspensions, in which students are removed from one or more classes during a single school day. Expulsion is the most serious consequence we can impose. Expelled students are removed from the school permanently and denied the opportunity to continue learning here.

| KEY FACTOR                          | OUR SCHOOL | DISTRICT AVERAGE | STATE AVERAGE |
|-------------------------------------|------------|------------------|---------------|

| 2006–2007                           | 0          | 0                | 1             |

SOURCE: Data is from the California Department of Education, SARC research file. Data represents the number of incidents reported, not the number of students involved. District and state averages represent middle schools only.

During the 2008–2009 school year, we had 24 suspension incidents. We had three incidents of expulsion. To make it easy to compare our suspensions and expulsions to those of other schools, we represent these events as a ratio (incidents per 100 students) in this report. Please note that multiple incidents may involve the same student.

**LEADERSHIP, TEACHERS, AND STAFF**

**Teacher Experience and Education**

| KEY FACTOR                                     | DESCRIPTION   | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|--|---|------------|----------------|---------------|
| <b>Teaching experience</b>                     | Average years of teaching experience  | 15         | 13             | 12            |
| <b>Newer teachers</b>                          | Percentage of teachers with one or two years of teaching experience                 | 0%         | 16%            | 12%           |
| <b>Teachers holding an MA degree or higher</b> | Percentage of teachers with an MA or higher from a graduate school                  | 29%        | 19%            | 36%           |
| <b>Teachers holding a BA degree alone</b>      | Percentage of teachers whose highest degree is a BA degree from a four-year college | 71%        | 81%            | 64%           |

SOURCE: Professional Assignment Information Form (PAIF), October 2008, completed by teachers during the CBEDS census. County and state averages represent middle schools only.

None of our teachers has fewer than three years of teaching experience, which is below the average for new teachers in other middle schools in California. Our teachers have, on average, 15 years of experience. About 71 percent of our teachers hold only a bachelor’s degree from a four-year college or university. About 29 percent have completed a master’s degree or higher.

**Credentials Held by Our Teachers**

| KEY FACTOR                         | DESCRIPTION   | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|------------------------------------|---|------------|----------------|---------------|
| <b>Fully credentialed teachers</b> | Percentage of staff holding a full, clear authorization to teach at the elementary or secondary level | 100%       | 93%            | 95%           |
| <b>Trainee credential holders</b>  | Percentage of staff holding an internship credential  | 0%         | 4%             | 4%            |
| <b>Emergency permit holders</b>    | Percentage of staff holding an emergency permit   | 0%         | 2%             | 2%            |
| <b>Teachers with waivers</b>       | Lowest level of accreditation, used by districts when they have no other option                       | 0%         | 2%             | 1%            |

SOURCE: PAIF, October 2008. This is completed by teachers during the CBEDS census. County and state averages represent middle schools only. A teacher may have earned more than one credential. For this reason, it is likely that the sum of all credentials will exceed 100 percent.

All of the faculty at Bear River hold a full credential. This number is higher than the average for all middle schools in the state. None of the faculty at Bear River holds a trainee credential, which is reserved for those teachers who are in the process of completing their teacher training. In comparison, four percent of middle school teachers throughout the state hold trainee credentials. None of our faculty holds an emergency permit. Very few middle school teachers hold this authorization statewide (just two percent). All of the faculty at Bear River hold the secondary (single-subject) credential. This number is above the average for middle schools in California, which is 82 percent. You can find three years of data about teachers’ credentials in the Data Almanac that accompanies this report.

**Indicators of Teachers Who May Be Underprepared**

| KEY FACTOR   | DESCRIPTION   | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|--|---|------------|----------------|---------------|
| <b>Core courses taught by a teacher not meeting NCLB standards</b> | Percentage of core courses not taught by a “highly qualified” teacher according to federal standards in NCLB      | 0%         | N/A            | 0%            |
| <b>Out-of-field teaching</b>                                       | Percentage of algebra and science courses taught by a teacher who lacks the appropriate credential for the course | 16%        | 50%            | 30%           |
| <b>Teachers lacking a full credential</b>                          | Percentage of teachers without a full, clear credential   | 0%         | 7%             | 5%            |

SOURCE: Professional Assignment Information Form (PAIF) of October 2008. Data on NCLB standards is from the California Department of Education, SARC research file.

**“HIGHLY QUALIFIED” TEACHERS:** The federal law known as No Child Left Behind (NCLB) requires districts to report the number of teachers considered to be “[highly qualified](#).” These “highly qualified” teachers must have a full credential, a bachelor’s degree, and, if they are teaching a core subject (such as reading, math, science, or social studies), they must also demonstrate expertise in that field. The table above shows the percentage of core courses taught by teachers who are considered to be less than “highly qualified.” There are exceptions, known as the [High Objective Uniform State Standard of Evaluation](#) (HOUSSE) rules, that allow some veteran teachers to meet the “highly qualified” test who wouldn’t otherwise do so.

**TEACHING OUT OF FIELD:** When a teacher lacks a subject area authorization for a course she is teaching, that course is counted as [out-of-field](#). The students who take that course are also counted. For example, if an unexpected vacancy in a biology class occurs, and a teacher who normally teaches English literature (and who lacks a subject area authorization in science) fills in to teach for the rest of the year, that teacher would be teaching out of field. See the detail for algebra and science in the Out-of-Field Teaching table. About 16 percent of our core courses were taught by teachers who were teaching out of their field of expertise, compared with 30 percent of core courses taught by such middle school teachers statewide.

**CREDENTIAL STATUS OF TEACHERS:** Teachers who lack full credentials are working under the terms of an emergency permit, an internship credential, or a waiver. They should be working toward their credential, and they are allowed to teach in the meantime only if the school board approves. None of our teachers was working without full credentials, compared with five percent of teachers in middle schools statewide.

**Out-of-Field Teaching, Detail by Selected Subject Areas**

| CORE COURSE    | DESCRIPTION  | OUR SCHOOL | COUNTY AVERAGE | STATE AVERAGE |
|----------------|--|------------|----------------|---------------|
| <b>Algebra</b> | Percentage of algebra courses taught by a teacher lacking the appropriate subject area authorization | 38%        | 36%            | 25%           |
| <b>Science</b> | Percentage of science courses taught by a teacher lacking the appropriate subject area authorization | 6%         | 57%            | 33%           |

SOURCE: PAIF, October 2008. This is completed by teachers during the CBEDS census. County and state averages represent middle schools only.

In this more detailed analysis, you’ll find the percentage of algebra courses taught by teachers who lack subject-area authorization in math. While algebra teachers in some middle schools might not formally be required to hold this math subject-area authorization, it is better if they do. We have applied the same criteria to science courses taught at all middle school grade levels. Note that school board policy determines which grade levels are secondary grade levels and require teachers to hold a secondary (single-subject) credential, and which are primary grade levels requiring an elementary (multiple-subject) credential.

**Districtwide Distribution of Teachers Who Are Not “Highly Qualified”**

Here, we report the percentage of core courses in our district whose teachers are considered to be less than “highly qualified” by NCLB’s standards. We show how these teachers are distributed among schools according to the percentage of low-income students enrolled.

The CDE has divided schools in the state into four groups (quartiles), based on the percentage of families who qualify and apply for free or reduced-price lunches. The one-fourth of schools with the most students receiving subsidized lunches are assigned to the first group. The one-fourth of schools with the fewest students receiving subsidized lunches are assigned to the fourth group. We compare the courses and teachers assigned to each of these groups of schools to see how they differ in “highly qualified” teacher assignments.

The average percentage of courses in our district not taught by a “highly qualified” teacher is zero percent, compared with one percent statewide.

| DISTRICT FACTOR                                    | DESCRIPTION   | CORE COURSES NOT TAUGHT BY HQT IN DISTRICT |
|--|---|--|
| <b>Districtwide</b>                                | Percentage of core courses not taught by “highly qualified” teachers (HQT)                  | 0%   |
| <b>Schools with the most low-income students</b>   | First quartile of schools whose core courses are not taught by “highly qualified” teachers  | N/A  |
| <b>Schools with the fewest low-income students</b> | Fourth quartile of schools whose core courses are not taught by “highly qualified” teachers | N/A  |

SOURCE: Data is from the California Department of Education, SARC research file.

### Specialized Resource Staff

Our school may employ social workers, speech and hearing specialists, school psychologists, nurses, and technology specialists. These specialists often work part time at our school and some may work at more than one school in our district. Their schedules will change as our students’ needs change. For these reasons, the staffing counts you see here may differ from the staffing provided today in this school. For more details on [statewide ratios of counselors, psychologists, or other pupil services](#) staff to students, see the California Department of Education (CDE) Web site. [Library facts](#) and frequently asked questions are also available there.

**ACADEMIC GUIDANCE COUNSELORS:** More information about [counseling and student support](#) is available on the CDE Web site.

| STAFF POSITION                      | STAFF (FTE) |
|-------------------------------------|-------------|
| Counselors                          | 0.0         |
| Librarians                          | 0.0         |
| Psychologists                       | 0.0         |
| Social workers                      | 0.0         |
| Nurses                              | 0.0         |
| Speech/language/hearing specialists | 0.0         |
| Resource specialists                | 0.0         |

SOURCE: CBEDS census, October 2008.

**TECHNICAL NOTE ON DATA RECENCY:** All data is the most current available as of December 2009. The CDE may release additional or revised data for the 2008–2009 school year after the publication date of this report. We rely on the following sources of information from the California Department of Education: California Basic Education Data System (CBEDS) (October 2008 census); Language Census (March 2009); California Achievement Test and California Standards Tests (spring 2009 test cycle); Academic Performance Index (September 2009 growth score release); Adequate Yearly Progress (September 2009).

**DISCLAIMER:** School Wise Press, the publisher of this accountability report, makes every effort to ensure the accuracy of this information but offers no guarantee, express or implied. While we do our utmost to ensure the information is complete, we must note that we are not responsible for any errors or omissions in the data. Nor are we responsible for any damages caused by the use of the information this report contains. Before you make decisions based on this information, we strongly recommend that you visit the school and ask the principal to provide the most up-to-date facts available.

### Physical Fitness

Students in grades five, seven, and nine take the California Fitness Test each year. This test measures students’ aerobic capacity, body composition, muscular strength, endurance, and flexibility using six different tests. The table below shows the percentage of students at our school who scored within the “healthy fitness zone” on four, five, and all six tests. More information about [physical fitness testing and standards](#) is available on the CDE Web site.

| GRADE LEVEL    | PERCENTAGE OF STUDENTS MEETING HEALTHY FITNESS ZONES |                       |                      |
|----------------|--|-----------------------|----------------------|
|                | FOUR OF SIX STANDARDS                                | FIVE OF SIX STANDARDS | SIX OF SIX STANDARDS |
| <b>Grade 5</b> | N/A  | N/A                   | N/A                  |
| <b>Grade 7</b> | 8%   | 23%                   | 60%                  |
| <b>Grade 9</b> | N/A  | N/A                   | N/A                  |

SOURCE: Physical fitness test data is produced annually as schools test their students on the six Fitnessgram Standards. Data is reported by Educational Data Systems.

**STUDENT PERFORMANCE**

**California Standardized Testing and Reporting Program**

The California Standards Tests (CST) show how well students are doing in learning what the state content standards require. The CST include English/language arts and mathematics in grades six through eight; science in grade eight; and history/social science in grade eight. Student scores are reported as performance levels. We also include results from the California Modified Assessment and California Alternative Performance Assessment (CAPA).

**STAR Test Results for All Students: Three-Year Comparison**

The percentage of students achieving at the Proficient or Advanced level (meeting or exceeding the state standards) for the most current three-year period.

| SUBJECT                   | SCHOOL<br>PERCENT PROFICIENT OR<br>ADVANCED |      |      | DISTRICT<br>PERCENT PROFICIENT OR<br>ADVANCED |      |      | STATE<br>PERCENT PROFICIENT OR<br>ADVANCED |      |      |
|---------------------------|---|------|------|---|------|------|--|------|------|

### NAEP: California’s 4th and 8th Graders Compared to Students Nationally

Federal education officials want parents to understand how their state’s students compare to students nationally. For this purpose, they created the test called the National Assessment of Educational Progress (NAEP). It is sometimes called the Nation’s Report Card. Students in grades four, eight, and twelve take this test in nine subject areas. The NAEP test results are not valid for schools or districts. For that reason, you only see results below for students statewide.

#### Reading and Math Results

This table shows the average NAEP score (scores range from zero to 500) for the state and the nation, and the percentage of California students grouped into each of three achievement levels (Basic, Proficient, and Advanced). We compare our state’s fourth and eighth graders with their peers in the U.S. in reading and math.

| SUBJECT AND GRADE LEVEL   | AVERAGE SCALE SCORE |          | PERCENTAGE OF CA STUDENTS AT EACH ACHIEVEMENT LEVEL |            |          |
|---------------------------|---------------------|----------|---|------------|----------|
|                           | STATE               | NATIONAL | BASIC   | PROFICIENT | ADVANCED |
| Reading 2007, Grade 4     | 209                 | 220      | 30%   | 18%        | 5%       |
| Reading 2007, Grade 8     | 251                 | 261      | 41%   | 20%        | 2%       |
| Mathematics 2007, Grade 4 | 232                 | 239      | 41%   | 25%        | 5%       |
| Mathematics 2007, Grade 8 | 270                 | 282      | 36%   | 18%        | 5%       |

### Participation Rates for Students with Disabilities and English Learners

This table shows the percentage of the nation’s and California’s students with disabilities and English Learners who took the test called the National Assessment of Educational Progress (NAEP).

| SUBJECT AND GRADE LEVEL   | STATE PARTICIPATION RATE   |                  | NATIONAL PARTICIPATION RATE |                  |
|---------------------------|----------------------------|------------------|-----------------------------|------------------|
|                           | STUDENTS WITH DISABILITIES | ENGLISH LEARNERS | STUDENTS WITH DISABILITIES  | ENGLISH LEARNERS |
| Reading 2007, Grade 4     | 74%                        | 93%              | 65%                         | 80%              |
| Reading 2007, Grade 8     | 78%                        | 92%              | 66%                         | 77%              |
| Mathematics 2007, Grade 4 | 79%                        | 96%              | 84%                         | 94%              |
| Mathematics 2007, Grade 8 | 85%                        | 96%              | 78%                         | 92%              |

For further information, you can read what the California Department of Education says about the [differences between the California Standards Tests and the National Assessment of Educational Progress](#). The NAEP Web site includes background information for parents about the [Nation’s Report Card](#). Educators can learn more by going to the [NAEP Web site](#).

**ACCOUNTABILITY**

**California Academic Performance Index (API)**

The Academic Performance Index (API) is an annual measure of the academic performance and progress of schools in California. APIs range from 200 to 1000, with a statewide target of 800. Detailed information about the API can be found on the CDE Web site at <http://www.cde.ca.gov/ta/ac/ap/>.

**API Ranks: Three-Year Comparison**

The state assigns statewide and similar-schools API ranks for all schools. The API ranks range from 1 to 10. A statewide rank of 1 means that the school has an API in the lowest 10 percent of all middle schools in the state, while a statewide rank of 10 means that the school has an API in the highest 10 percent of all middle schools in the state. The similar-schools API rank reflects how a school compares with 100 statistically matched schools that have similar teachers and students.

| API RANK             | 2006–2007 | 2007–2008 | 2008–2009 |
|----------------------|-----------|-----------|-----------|
| Statewide rank       | 7         | 7         | 6         |
| Similar-schools rank | 6         | 2         | 3         |

SOURCE: The API Base Report from August 2009.

**API Changes by Subgroup: Three-Year Comparison**

API changes for all students and student subgroups: the actual API changes in points added or lost for the past three years, and the most recent API. Note: "N/A" means that the student group is not numerically significant.

| SUBGROUP                         | ACTUAL API CHANGE |           |           | API       |
|----------------------------------|-------------------|-----------|-----------|-----------|
|                                  | 2006–2007         | 2007–2008 | 2008–2009 | 2008–2009 |
| All students at the school       | -10               | +9        | +12       | 782       |
| African American                 | N/A               | N/A       | N/A       | N/A       |
| American Indian or Alaska Native | N/A               | N/A       | N/A       | N/A       |
| Asian                            | N/A               | N/A       | N/A       | N/A       |
| Filipino                         | N/A               | N/A       | N/A       | N/A       |
| Hispanic or Latino               | N/A               | +13       | -9        | 758       |
| Pacific Islander                 | N/A               | N/A       | N/A       | N/A       |
| White (non Hispanic)             | -12               | +6        | +23       | 795       |
| Economically disadvantaged       | +8                | +37       | N/A       | N/A       |
| English Learners                 | N/A               | N/A       | N/A       | N/A       |
| Students with disabilities       | N/A               | N/A       | N/A       | N/A       |

SOURCE: The API Growth Report as released in the Accountability Progress Report in October 2009.

### Federal Adequate Yearly Progress (AYP) and Intervention Programs

The federal law known as No Child Left Behind requires that all schools and districts meet all three of the following criteria in order to attain Adequate Yearly Progress (AYP):

- (a) a 95-percent participation rate on the state’s tests
- (b) a CDE-mandated percentage of students scoring Proficient or higher on the state’s English/language arts and mathematics tests
- (c) an API of at least 590 or growth of at least one point

#### AYP for the District

Whether the district met the federal requirement for AYP overall, and whether the school and the district met each of the AYP criteria.

| AYP CRITERIA                                | DISTRICT |
|---|----------|
| Overall                                     | No       |
| Graduation rate                             | No       |
| Participation rate in English/language arts | Yes      |
| Participation rate in mathematics           | Yes      |
| Percent Proficient in English/language arts | Yes      |
| Percent Proficient in mathematics           | Yes      |
| Met Academic Performance Index (API)        | Yes      |

SOURCE: The AYP Report as released in the Accountability Progress Report in September 2009.

#### Intervention Program: District Program Improvement (PI)

Districts receiving federal Title I funding enter Program Improvement (PI) if they do not make AYP for two consecutive years in the same content area (English/language arts or mathematics) and for each grade span or on the same indicator (API or graduation rate). After entering PI, districts advance to the next level of intervention with each additional year that they do not make AYP.

| INDICATOR                             | DISTRICT |
|---------------------------------------|----------|
| PI stage                              | 1 of 3   |
| The year the district entered PI      | 2009     |
| Number of schools currently in PI     | 0        |
| Percentage of schools currently in PI | 0%       |

SOURCE: The Program Improvement Report as released in the Accountability Progress Report in September 2009.

**DISTRICT EXPENDITURES**

According to the CDE’s SARC Data Definitions, “State certification/release dates for fiscal data occur in middle to late spring, precluding the inclusion of 2008–09 data in most cases. Therefore, 2007–08 data are used for report cards prepared during 2009–10.”

Total expenses include only the costs related to direct educational services to students. This figure does not include food services, land acquisition, new construction, and other expenditures unrelated to core educational purposes. The expenses-per-student figure is calculated by dividing total expenses by the district’s average daily attendance (ADA). More information is available on the [CDE’s Web site](#).

| CATEGORY OF EXPENSE          | OUR DISTRICT | SIMILAR DISTRICTS | ALL DISTRICTS |
|------------------------------|--------------|-------------------|---------------|
| <b>FISCAL YEAR 2007–2008</b> |              |                   |               |
| Total expenses               | \$14,274,363 | N/A               | N/A           |
| Expenses per student         | \$11,577     | \$8,267           | \$8,594       |
| <b>FISCAL YEAR 2006–2007</b> |              |                   |               |
| Total expenses               | \$13,843,423 | N/A               | N/A           |
| Expenses per student         | \$10,511     | \$7,789           | \$8,117       |

**District Salaries, 2007–2008**

This table reports the salaries of teachers and administrators in our district for the 2007–2008 school year. This table compares our average salaries with those in districts like ours, based on both enrollment and the grade level of our students. In addition, we report the percentage of our district’s total budget dedicated to teachers’ and administrators’ salaries. The costs of health insurance, pensions, and other indirect compensation are not included.

| SALARY INFORMATION                                | DISTRICT AVERAGE | STATE AVERAGE |
|---|------------------|---------------|
| Beginning teacher’s salary                        | \$37,565         | \$41,031      |
| Midrange teacher’s salary                         | \$72,422         | \$63,366      |
| Highest-paid teacher’s salary                     | \$80,284         | \$80,596      |
| Average principal’s salary (middle school)        | \$117,490        | \$105,066     |
| Superintendent’s salary                           | \$141,402        | \$147,438     |
| Percentage of budget for teachers’ salaries       | 37%              | 41%           |
| Percentage of budget for administrators’ salaries | 8%               | 6%            |
