We've had LOTS of new stuff during this lockdown. The video is a new song our band wrote called "Ghost Town" which is specifically about the lockdown. In the pictures, we got a new patio cover and patio furniture, I got a new pickup (sold my little old Ranger), got our new puppy (Trixie), and the final picture is a new baby in our family, Sebastian. He's my great nephew born to my nephew Wesley and his wife (held in this picture by my daughter Caylin.)

THE WATCH THAT BUILT A NATION

It started with the signing of the Pacific Railway Act of 1862 by President Abraham Lincoln. The Central Pacific Railroad of California, chartered in 1861, was authorized to build a line east from Sacramento. At the same time, the Act chartered the Union Pacific Railroad Company to build west from the Missouri River. The original legislation granted each railroad 6,400 acres and up to \$48,000 in government bonds for each mile completed. And so, The Great Race began.

After the completion of the transcontinental railroad, communities all along the backbone of the Western United States – some created by the railroad – were forever changed.

All of the thousands and thousands of deadlines, schedules, paychecks, and other details, such a train times for the next 150 years were in large part decided by the RAILWAY WATCH.

The sheer immensity of the task and the millions of passengers, job seekers, adventures, immigrants, day dreamers, politicians, etc. who arrived on time over the last 150 years made United States the magnificent country it is today. This Monumental task was accomplished by ordinary men and the Rail Road WATCH.

To commemorate this epic history, we are proud to present this R.R. Standard Quartz quality keepsake of this UNSUNG HERO OF NATION BUILDING.

Something I received during isolation was matching shirts for Hudson and I that is very dear to my heart. It was so thoughtful and helps bring awareness ♡Angela Waltz
