We Miss You All!!!!

Cruz Valdespino learning Kindergarten math from Ms. Jensen

Mr. Shaw's Class

Doing work and not complaining #momwins

Brodee Malecha working on his 5th grade math assignments!

Plant Clan is getting in the groove of this distance learning/teaching thing! One is writing a paper about cockatiels, it's so nice that he can hold his inspiration for writing his paper! The other is making himself comfy learning about the half hour while learning about telling time. A trip to the doctor for cast removal meant we practiced safety while wearing it masks. We are all in this together!

Distance Learning with friends
for Waylon Taggart & Deegan
McBride

Bear River Paint and Repair

See the before and after picture. Ignore the color change as it is a lighting thing. The Color actually matches. Look at the top picture (before) with all the stucco cracks. Then look at the bottom picture (after) where they have all been repaired and covered with the specialized paint. I know for many it's a little thing but I love the fact that when the students return they will see a NEW looking school!!!
